# FuelForce Site PC Host Software

# FuelServe.Net Web Hosting Service

Host Software - Loaded On Customer PC	Description
<b>Standard Single PC</b>	Can be installed on site or remote PC. Single PC license. Lowest priced software package.
<b>Server</b>	Installed on site or remote Server. Can serve client PC's on a customers network.
<b>SQL Database Server</b>	SQL database is the preferred database format for many customers. Is compatible with most third party software packages.

## FuelForce Host Software Options Loaded Onto Customers IT Hardware

### A) Host Software (Single PC License)

- Connectivity with dedicated analog phone line.
- Client grants user ID and Password access to employees who then utilize FuelForce software from the same single PC.

### B) Host Software (SERVER License)

- Connectivity with dedicated analog phone line.
- Software resides on a SERVER, and the client selects a workstation on their network to perform the polling of the fuel controller.
- Client grants user ID and Password access to own employees.

### C) Host Software (Interactive SERVER License)

- Connectivity using CAT5E/6 network cable into the clients network.
- Client grants user ID and Password access to own employees.

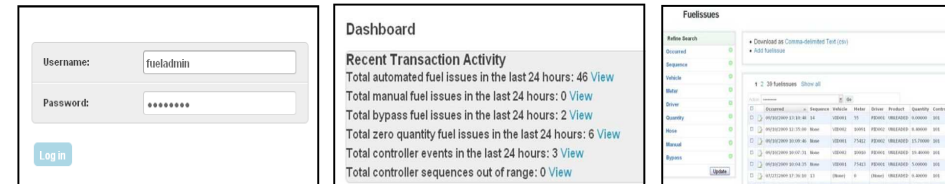

### D) SQL Host Software (SQL SERVER License)

- Connectivity through a dedicated analog phone line on a workstation that is connected to a Server.
- FuelForce SQL Application attaches to client's existing SQL database (Client must license SQL Server if they do not already have it).
- Client grants user ID and Password access to client's own employees.

### E) SQL Host Software (Interactive SQL SERVER License)

- Connectivity using CAT5E/6 network cable into the clients network.
- FuelForce SQL Application attaches to client's existing SQL database (Client must license SQL Server if they do not already have it).
- Client grants user ID and Password access to client's own employees.

FuelServe.Net Web Base Hosting (No FuelForce Software Required)	Description
<b>FuelServe.Net Lite</b> (Demo Available)	Lite Web Based Hosting. 1 Administrator User.
<b>FuelServe.Net Full</b> (Demo Available)	Web Based Hosting. Unlimited Users. Full Functionality.

Your FuelServe.Net web site (sample pages).
