

FUELFORCE®

PORTABLE FUEL SYSTEMS

Take control of your fuel operations with an integrated fuel tank, dispenser and FuelForce® fuel controller. Multiforce, working together with tank manufacturers, are now offering portable, skid-based fuel systems that are configured to your product and volume needs, and then delivered directly to your site.

The FuelForce® 894-C fuel controller authorizes and controls the dispensing of products to fleet vehicles while collecting accurate, valuable fuel usage and vehicle data for fleet management.

FuelForce® is unmatched in ease-of-use by both vehicle operators and management personnel, while the card reader provides flexibility for in-house, fleet card and credit card transactions.

Anything less will cost you more.

FUELFORCE® System Features and Benefits

Security – You control all aspects of security including access to fueling sites, access to island terminals, access to sensitive data, and authorization for issuing fuel. Each of these critical areas allows you to authorize fuel in a timely and efficient manner.

Transaction & Billing Reports – Now you will receive transaction and billing reports that detail time, site, vehicle, odometer, driver, fuel issued and other data that you determine is relevant. The fuel management system flexibility allows you to capture a daily shift report from any fuel controller, or send reports or files to various departments and agencies. Ask about the data and report integration options that are available using your existing fleet card.

Tank & Dispenser – You select the volume from 2,000 to 10,000 gallons, one or two products, the dispenser flow rate and fire rating. Your full system is then factory manufactured and delivered at a competitive cost. Complete above ground systems reduce time to delivery, installation and startup time, while providing you a portable, resalable asset.

FUELFORCE® Your Data At The Controller

Your existing fuel / fleet software or a spreadsheet can be used to load the necessary fuel controller data. The controller then contains all data elements required to control fuel and produce reports. Vehicle and Driver updates are quick and easy, and reports can be tailored to fit your needs.

FUELFORCE® 894-C Card Reader Controller Specifications

- ◆ Rugged numeric 16 button flat faced keypad
- ◆ Four line, 80 character LCD backlit screen
- ◆ 'Add Products' button for entering oil or fluids
- ◆ Functional at -20° to 140°F
- ◆ Solid state disk storage
- ◆ Weather resistant corrosion resistant housing
- ◆ Reliable magnetic stripe card reader
- ◆ 25,000 vehicles and 25,000 driver capacity
- ◆ Communication via telephone line
- ◆ Power and communication line protection
- ◆ Overhanging hood design reduces glare

FUELFORCE® System Advantages

Convenience

- Move the Fuel System if your business moves
- No software or training needed at your site
 - Receive monthly transaction reports
- All fuel data in a single database
 - Positive database at the fuel island
- 800 telephone number for Customer Service

Control

- Place the Fuel System where you need it
- Virtual elimination of fuel shrinkage
- Automatic odometer checking
- Obtain daily shift file reports from any PC

Cost Savings

- Factory wired integrated tank, dispenser, controller system reduces on-site labor and uncertain site preparation costs
- Simple card & keypad input ensures accurate fuel reporting
- Reduces end user clerical effort
 - Import/Export data capability to 3rd party software
- Identification of off-road fuel tax rebates
 - Optional reports that facilitate tax rebate applications
- Keypad transactions for low volume or non-card equipment
- System reliability lowers your total cost of ownership
