

FUELFORCE MOBILE TANKER TRUCK UNIT

The FuelForce Mobile Tanker Unit is a fuel controller that authorizes, captures, and records fuel & other dispensed fluids from your tank truck or pickup truck mounted fuel dispenser with wireless or cellular data transfers.

FUEL TANK RECONCILIATION FOR EVERY MOBILE FUEL TRUCK EVERY DAY!

Imagine being able to control all fuel dispensed to vehicles in the field, or on the job site by mobile fuel delivery trucks. That is exactly what the Mobile Tanker unit does with ease and accuracy. Now you can validate vehicle ID, fuel type, and even meter readings prior to authorizing a transaction.

The fuel truck operator enters the odometer or hour meter followed by the vehicle number and the hose number. The FuelForce Mobile Tanker Truck unit has the option of entering fuel quantity manually or automatically through the FuelForce dispenser interface module. The transaction is date / time stamped and stored in solid state memory until it is transmitted back to your computer.

The fuel truck communicates with the Host PC and recovers the outstanding transactions, and updates the terminal's vehicle database, meter readings, and other parameters.

No more unreadable fuel sheets!
No more lost fuel!

BENEFITS:

- ✓ Fast, accurate capture of fuel issued to vehicles.
- ✓ Improved tracking of on-site field equipment.
- ✓ Reduced errors due to poor hand writing.
- ✓ Reduced fuel loss theft, and clerical input time.
- ✓ Spots under or over utilization of equipment.
- ✓ Complete control of fuel for off highway vehicles.
- ✓ Automatic tank reconciliation of each tanker truck.

DATA COMMUNICATION OPTIONS:

The FuelForce Mobile Tanker Truck Unit communicates with the Host computer through the one of the configured options: retractable hardwire telephone line or CAT5e network cable, short range wireless transmission, or by wireless cellular data transmission (confirm coverage in your area).

AUTHORIZATION OPTIONS:

Keypad Entry- All information (Driver, Vehicle, Meter Reading) can be entered through the alphanumeric keypad.

Fleet Card or Credit Card- The card can correspond to a vehicle number or an individual as an additional verification condition.

BILLING:

Electronic recording and processing of transactions from the Mobile Tanker Truck Units will allow you to account for and bill each transaction faster than ever before.
