

Take control of your fuel operations with the economical FuelForce® system by Multiforce. Whatever the number and wherever the locations of your fuel sites, FuelForce® is the right solution...  
*Your Total Fuel Management Solution.*

## Features and Benefits

### Authorization

Choose authorization options that match your existing operating procedures or add new levels of control. Require odometer or meter verification for all or selected groups of vehicles.

### Reports

Now you will receive transaction and billing reports that detail site, date, time, vehicle, odometer, driver, fuel type, quantity, and other data that you determine is relevant. Run standard or adhoc reports showing vehicle performance, tank reconciliation, department billing and PM planning. Flexible FUELFORCE® software allows you to synchronize your data with other Fleet Management, HR, or Billing software.

### Compliance

Integrate your tank monitoring systems with FUELFORCE® to meet tight federal and state regulations. From your PC you can now determine fuel reordering points, spot leaks, obtain alarm notifications, and perform tank reconciliation on each tank and at every location.

### Security

Control all aspects of security including access to fueling sites, access to island terminals, access to sensitive data, and authorization for issuing fuel. Authorize fuel only to valid vehicles by valid drivers, all in a timely and efficient manner.

MANAGEMENT SYSTEMS**

## Input Options

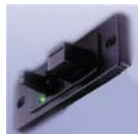

### Keypad

Simple entry of vehicle, driver, odometer and hose through a durable keypad is the most cost effective and a highly secure data entry solution. The keypad is the base line and an emergency backup for all other input options.

### Magnetic Stripe Card Reader

You may use House Account Cards, our Debit Card, Credit Cards or Fleet Credit Cards in your FUELFORCE® controller. A single card solution for retail site purchases and your on-site fueling.

### Proximity Card or Key Reader

You may use the same Employee/Driver Access Badge that you use for building access to validate your Drivers at the controller. Secure prox keys can be attached to each vehicle's key ring.

### Wireless Vehicle Tags ~ OBD-II

Vehicles equipped with RFID tags allow instant authorization and odometer collection. For EasyFuel equipped vehicles, you can also identify Vehicle ID, odometer, and vehicle performance data automatically with receivers at access points, gates or the island.

## Communication Options

### Interactive Network Connection

Tie your FUELFORCE® controller to your wide area network for near real-time transfer of data with your FUELFORCE® "Host" database.

### Telephone Dialup Modem

Transfer data by standard analog phone line with your FUELFORCE® "Host" database via a file based protocol in a secure, timely manner. A direct, hardwired cable can be used for single sites.

### Wireless Transmitters or

### WiFi Radio Link

Remote, but nearby, your "Host" computer connects via wireless transmitters or WiFi protocol to exchange data. Site preparation costs are minimal. Very attractive for existing fuel sites, Portable (skid mounted) Fuel Systems, and mobile tanker units.

# FUELFORCE® 894 Controller Specifications

- ◆ Rugged numeric 16 button flat faced keypad
- ◆ Four line, 80 character LCD backlit screen
- ◆ Controls up to 4 hoses per controller
- ◆ Functional at -20° to 140°F
- ◆ Solid state disk storage
- ◆ Weather resistant corrosion resistant housing
- ◆ 'Add Products' button for entering oil or fluids
- ◆ 100,000 vehicles and 100,000 driver capacity
- ◆ Serial link to Tank Level Sensing equipment
- ◆ Power and communication line protection
- ◆ Overhanging hood design reduces glare
- ◆ Optional control of gate or carwash devices
- ◆ Optional magnetic stripe card reader
- ◆ Optional proximity key / card reader
- ◆ Optional wireless vehicle tag solution

## Comprehensive Support Services

**Superior Customer Support** – Responsive, Economical and Effective !

Your Fuel/Fleet supervisor gets prompt, expert assistance from our support staff, with one call to our customer friendly 1-800 telephone support team. Repair & replacement parts can be shipped the same or next day to keep your FuelForce® System up and running.

### **FuelStream™**

Fuel transaction submitted directly to your fleet card bank for settlement. You receive reports for cost distribution within your organization and charges and payments are made directly by the bank. Vehicle performance data can be submitted to your fleet management system to assist in scheduled maintenance.

### **FuelServe™**

Trained fuel management professionals maintain your database, monitor controller performance, and record bulk fuel deliveries. Your secure online account allows Vehicle / Driver adjustments and reporting. The FUELFORCE® Team also notifies you when your attention is required.

## FUELFORCE® Advantages

### Convenience

- No software or training needed at your site.
- Obtain online, email or hard copy reports.
- Pull daily reports using your existing PC.
- All fuel data in a single database at the fuel island.
- 800 telephone number for Customer Support.

### Control

- Virtual elimination of fuel shrinkage.
- Automatic odometer checking at your site.
- Obtain tank reconciliation reports.
- Optional retail network interface for fleet cards or credit card transactions.

### Cost Savings

- Reduce your clerical effort with electronic data capture. Multiforce can "FuelServe™" your fuel management for you. Import/Export data capability to 3rd party software.
- Identification of off-road fuel tax rebates. Optional reports that facilitate tax rebate applications.
- System reliability lowers your total cost of ownership.
- Simple expansion & upgrade paths add system flexibility & value.
