New From Multiforce - The "WAVE" Fuel Controller

Here's where to find more information on Multiforce Systems products and services:

- www.FuelForce.com
- Phone: 609-683-4242
- Email : Sales@FuelForce.com

Multiforce has responded to your fleet's need for a robust, reliable, secure and cost effective Fuel Management System. This new Fuel Island Controller, called the "FuelForce® Wave", is available in a high security, all weather environment enclosure. Our unique and proven design principals are preserved in the new system, but the hardware and software take advantage of today's top performing components. This system recognizes the need to adapt to the future and provides a path for incorporating emerging technologies.

The WAVE Fuel Controller provides:

Low Cost Vehicle Tags - "No Tag - No Fuel"

If you want to identify and restrict all vehicles, equipment, and containers that require fueling at your site, the low cost Vehicle Tag option is a popular solution. In other words - "No Tag - No Fuel".

- Lowest cost vehicle tags offered in the industry
- Proximity Tag or Barcode Tag options
- Easily installed Tags - 10 minutes
- No calibration or cables required
- Durable in the harshest environments
- Weather / Vibration resistant

- If the vehicle, equipment, or container does not have a Tag, it cannot be fueled at your site
- Vehicles can be outfitted in remote locations
- Tags can be affixed to any container or equipment that requires fuel. Gas cans, lawn equipment etc.
- Fastest way to roll-out your "No Tag - No Fuel" program
- Increased security for your fueling sites
- Long lasting Tags are passive devices - No battery that can go dead

Low Cost Barcode Tag

Any Container Can Have A Tag

Low Cost Proximity Tag

Any Equipment That Can Be Fueled On Site Can Be Tagged And Fuel Loss Eliminated.

“MultiForum” Newsletter - Fall of 2008!

A Message from our Company President -

As we close out another great year at Multiforce, I want to thank you all for your continued support of the FuelForce system. We are looking forward to another banner year in 2009.

2008 saw several important innovations from Multiforce. We introduced the WAVE site controller (see details on the newsletter cover). This unit will include all new site software with the same database that will be used in our host systems. That means the customer can access each fuel controller via a web interface. Imagine being able to download prices, add vehicles and drivers, and query each site controller from your PC, laptop or even your PDA.

Our new web-based software also allows our customers to capture manual data from those very small sites for which automation cost is prohibitive. If any of you have small tanks at parks or off highway sites, you can now go on the internet and enter transactions against a live database of active vehicles and fuelers. While this system is less secure than an automated site, it does allow you to capture all your fuel in a single database. You may also enter deliveries and dip readings for these sites for tank reconciliation. You can also easily cost justify automation or even eliminating these sites based on high volumes, fuel losses, and high administrative cost.

Alternative fuels became very popular this year as we seek Energy independence and improved air quality. We see strong growth in the CNG market with our friends at Clean Energy and we offer a very cost effective E-85/Biodiesel vending solution with our business partners, U-Fuel and Bennett Pump Co. We are prepared to meet the growing demand for alternative fuel infrastructure over the coming decade.

Of course, we continue to provide the most flexible system for integrating with Fleet Management Systems and Fleet Credit Cards. We recently added Networkcar to our partner list in the new and expanding field of Telematics. This complements existing RFID Tag and proximity tag offerings.

If you wish to learn more about any of these and other new offerings, please contact us. You will be pleased with the low cost to upgrade for our existing supported customers. Remember, with FuelForce, you NEVER NEED TO BUY ANOTHER FUEL MANAGEMENT SYSTEM!

Tom Bates

Hosting Services - FuelServe™

Would you like to eliminate having a separate fuel manager at each of your fueling sites?

Great for customers with single or multiple fueling sites!

Let Multiforce dial into your sites automatically and provide your secure reports to you from our website!

FuelServe is a fuel management solution for updating and viewing your fleet fuel usage information in an easy to read format through our password protected web-site.

FuelServe provides a fleet manager with accurate vehicle fueling information for all of your fueling sites, and eliminates the need for software installation and training of your personnel at multiple sites.

With FuelServe, Multiforce provides:

- Access to your fleet data through our secure web site using any device that can access the internet - PC's, Cell Phones, PDA's etc.
- Update and maintain your vehicle and driver information
- Update fuel pricing
- Obtain your fuel transaction reports
- Daily shift file from each fueling site
- Customer Service with a toll free 1-800 number or email

FuelServe login on secure FuelForce website.

A Cell Phone or PDA can also be used to access your FuelServe Account

PDA
Wireless Laptop

Mobile Fueling Unit

If you want to be able to control and track all fuel dispensed to your vehicles and equipment in the field, or on the job site by your mobile fueling delivery trucks, the Mobile Fueling Unit from MultiForce Systems is your solution!

Now you can validate vehicle / equipment ID, fuel type, odometer / hour meter readings prior to authorizing a fuel transaction off of your fueling tanker trucks.

Also, you can utilize low cost vehicle / equipment tags to fuel only vehicles, equipment or containers that have the tag affixed to it (see cover page for more information on low cost tags). With a simple tag, even a 5 gallon gas can would be tracked!

The FuelForce Mobile Fueling Unit communicates with the host computer through either a retractable hardwire telephone line, CAT5 network cable, short range wireless transmission, or wireless cellular data transmission.

Totally Paperless System! - Get rid of hand written receipt slips or ticket printer receipts and eliminate fuel loss/ theft with the Mobile Tanker Unit from FuelForce!

Stainless Steel Option

Do you have a Marina or a Fueling Location near dusty, dirty, or salt air environment?

If you have a fueling site in an area where there is a lot of dust and dirt or salt air, look into the Stainless Steel Option for the 814 controller now!

Stainless Steel 814 Controller

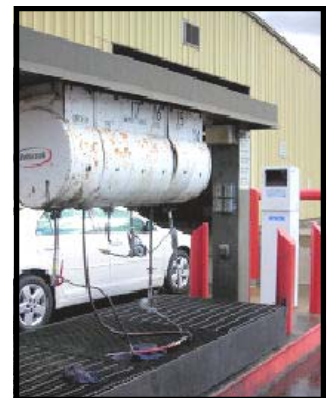

Customer Corner

You can't control the price, but you can control consumption. Fuel Management is the answer.

To help you adjust, here are 10 Ways to Cut Fuel Costs:

- Train and educate your drivers
- Decrease idling
- Start off slower
- Slow down
- Decrease vehicle weight
- Use a Fuel Management System
- Upgrade your fleet
- Tune-up vehicles regularly
- Inflate tires properly
- Implement advanced mobile asset management technology

FuelForce 814 Island Controller

The FuelForce® 814 is your total fuel management solution..... scalable, flexible, upgradeable, reliable and secure.

The FuelForce® 814 fuel controller authorizes and controls the dispensing of products to fleet vehicles from any number of sites while collecting accurate, valuable fuel usage and vehicle data for fleet management and fuel accounting.

The FuelForce 814 controller communicates with the site PC over LAN, phone line, or wireless communication.

814 Fuel Controller:

- Full alphanumeric keypad
- Complete fuel management software.
- Extensive reports for fuel management
- Controls up to 8 hoses (or up to 32 fueling points using remote terminals)
- Tank Gauge interface
- Interfaces with all current dispenser types

Hardware Options:

- Magnetic Card Reader
- Proximity Key or Card Reader
- Receipt Printer
- Wireless Communication

Host Software - Polling software that communicates with the 814 island controller is available in Stand Alone Host, Server or SQL Server database.

FuelForce 894 Island Controller

The 894 controller is a scaled down version of the 814. It performs the same functions as the 814 and handles up to 4 hoses for mechanical or electronic dispensers.

- Communicates with the on site PC using phone line, LAN line or wireless connection.
- Full reporting for all fuel

894 Fuel Controller:

- Extensive Reports
- Controls up to 4 hoses (mechanical or electronic dispensers).
- Connected to on site PC using phone line or LAN line or wireless connection.
- Easy administration of vehicles and drivers.

Hardware Options:

- Rugged Keypad (standard)
- Magnetic Card
- Proximity Key or Card Reader
- Wireless Vehicle ID
- Tank Gauge interface
- Interfaces with most dispenser types.

FuelForce EXACTA "In Pump" Controller Kit for Commercial or Retail Fueling Sites.

Multiforce has teamed up with Bennett Pump company to offer a fuel controller inside of the dispenser to offer added value to our customers by saving you important installation \$'s.

Multiforce offers the EXACTA field retrofit kit to be installed directly into the current Bennett 3700 series electronic commercial (volume only) and retail 3800 series (volume and price) fuel dispensers.

This controller offers all of the benefits of a MultiForce island mounted pedestal controller and is easily installed in the Bennett dispenser. Installation time, about 30 minutes. 1 EXACTA per fueling dispenser.

Choose input options: Keypad (standard on all units), Magnetic Stripe Card, Proximity Key FOB, Proximity Cards, or Vehicle ID tags (securely mounted to the vehicle).

The EXACTA is now available in the retail version to accept major credit cards and also offers an optional thermal receipt printer. Customers at municipal airports and marinas find this an attractive and low cost solution.
