

Low Cost Vehicle Identification Tags From FuelForce

“No Tag = No Fuel”

Control, identify and restrict on-site fueling to “Tagged” vehicles and equipment. FuelForce’s low cost Equipment & Vehicle Tags provide the tightest fuel control at your fuel site. Tags are easily installed in minutes. This allows you to equip small and large fleets quickly. Either Barcode Tags or Proximity Tags are available. Interfaces with all commercial pump types.

The Driver reads the Tag using a proximity or barcode reader on a fuel controller “wand”. If the vehicle or container does not have a Tag, it cannot get fuel. “No Tag = No Fuel”. Once the authorized Tag is read by the fuel controller, the odometer is entered at the keypad by the Driver and electronically checked for “reasonableness”; only good odometers are accepted.

Advantages of Low Cost Tags:

- Most Cost Effective and Reliable Vehicle Tags In The Industry
- Tags Easily Installed in Less Than 10 Minutes
- Fastest Roll-Out Time For Your Fleet
- Tamper Proof and Long Lasting Proximity or Barcode Tags
- No Expensive Cabling, Antennas Or Calibration Required

- **Lowest Cost Tags**
- **Increased Control**
- **Tags Are Easily Installed**
- **Eliminates Fuel Loss**
- **Saves 10-20% On Fuel Costs**

Proximity Tag System

Proximity Tag Fuel Management System

Proximity Reader wand is used to read vehicle tags

Proximity Tags are lightweight, durable and easily installed. Passive device - no battery

A tag can be installed quickly on a vehicle or container

The proximity reader identifies the vehicle

Barcode Tag System

Barcode Tag Fuel Management System

Barcode reader reads vehicle barcode

Any container can have a tag
