FUELFORCE®

The Premier Force in Fuel Management
FuelForce Exacta Fuel Controllers

Exacta
Fuel Controller
Features and Benefits

FuelForce® Advantages:

Durable and
Reliable Hardware

Secure Authorization
and Reporting

Wireless Data &
Reporting Access

FuelForce® Exacta Features

✔ Precise and Timely Control of All Fuel-Related Costs

✔ Manage Fuels of All Types, including Gas/Diesel, BioFuels, & CNG

✔ Access Cloud-Based Reporting from Any Device

✔ Multiple Input Options, including a Full Alphanumeric Keypad

✔ Wireless Communcations for Remote Sites

✔ Cost-Effective Remote Island Option for Larger Sites

The FuelForce® Exacta Fuel Controller is a modular controller designed to be embedded in a **Bennett 3000 Series Electronic Dispenser** or as a standalone unit. It allows drivers to utilize a numeric keypad, magnetic stripe card, key fob, or proximity card to authorize and control the dispensing of fuel products to fleet vehicles. As the fuel is dispensed, each transaction is logged and the system collects accurate and valuable fuel usage and vehicle data for fuel accounting and fleet maintenance.

The Exacta controls up to 4 pumps or 4 hoses & eliminates attended fueling and theft by using major credit cards. Now you can offer your customers 24 hour unattended fueling with receipts! The same fuel controller allows you to set up "House Accounts" in addition to accepting cash!

FuelForce® Exacta Benefits

Why FuelForce® Fuel Management?

Identify
Manually or automatically identify drivers and vehicles, reducing fuel theft and reporting misallocation.

Authorize
Authorize only valid drivers, valid vehicles, and/or valid odometer readings before dispensing fuel.

Measure
Accurately measure fuel dispensing transactions of all types, logging fuel data with precision.

Report
View standard and customizable reports for fuel usage across multiple sites and departments.

Authorization - You determine the authorization criteria that fits your needs, based on vehicle, driver, fuel type, and/or odometer checking. Our controllers also ensure the appropriate fuel is dispensed to the appropriate engine type.

Integration - FuelForce® permits data integration with your Fleet Management, HR, Accounting, and Facilities Management systems. Data is shared through a flexible import/export function with common file formats and ODBC interface connections.

Billing – With the FuelForce® system, fueling costs can be accurately allocated to the appropriate accounts or departments at modifiable prices (e.g. based on acquisition date), allowing for the accurate reporting of fuel costs by account.

Fuel Tank Management – FuelForce® controllers help fleets meet tight federal and state fuel regulations by providing optional integration with various tank-monitoring systems. With our TankWatch option, fuel deliveries and ATG dip readings can be automatically captured and stored to a central database.

Security – You control all aspects of security including access to the fueling sites, access to the island terminal, access to sensitive data, and authorization for dispensing fuel. FuelForce's® physical design and flexible user/account-based protection provide for extremely secure fueling.
