FuelForce® Advantages:

Durable and
Reliable Hardware

Secure Authorization
and Reporting

Wireless Data &
Reporting Access

FuelServe.net: Cloud-Based Fuel Management

The Benefits of FuelServe.net

With FuelServe.net, you can manage your fuel and power n the cloud. Provided on a Software as a Service model, you no longer need to load and maintain software onto your computer or server. With an internet connection and a standard web browser you can securely access your account anywhere, at anytime. Manage your fuel while in the field, at the office, or even from home. In case of an emergency, fuel may be securely authorized to new users at a click of a button.

With FuelServe.net, you get the following benefits:

Accuracy. Automating the logging of fueling transactions ensures that you know where and when fuel was dispensed and by whom and into which vehicle.

Shrinkage Reduction. Multiple levels of secure authorization are available, helping ensure there is no theft, misuse, or misallocation of fuel.

Proper Fueling. Down-to-the-hose control ties vehicle IDs to the proper fuel.

Departmental Cost Allocation. Vehicles can be assigned to departments permanently or on loan, tying fuel consumption and costs to particular departments or groups.

Anytime, Anywhere Access. Cloud-based means you can access your data when and where you need to, 24*7*365.

Data Redundancy. Your data is stored on multiple redundant data storage machines, using industry leading security standards.

Fully Integrated Reporting

The power of FuelServe.net is the unique ability we provide to see fully integrated reports of fuel and power use by site, department, vehicle, and driver, from a single dashboard and single reporting environment, including gasoline and diesel as well as bio-fuels, CNG, LNG, hydrogen, lubricants, and even **electricity** (for EV charging) side by side.

Occurred ▲	Product	Quantity	Department	Vehicle	Vehicle desc	Driver	Last name	First name
2018-08-08 00:02:57	DSL	28.2000	300	424	2017 FORD TRANSIT T-350 VAN	9185	FERNANDEZ	LUIS

Why FuelForce® Fuel Management?

Identify
Manually or automatically identify drivers and vehicles, reducing fuel theft and reporting misallocation.

Authorize
Authorize only valid drivers, valid vehicles, and/or valid odometer readings before dispensing fuel.

Measure
Accurately measure fuel dispensing transactions of all types, logging fuel data with precision.

Report
View standard and customizable reports for fuel usage across multiple sites and departments.
