Durable and Reliable Hardware

Secure Authorization and Reporting

Wireless Data & Reporting Access

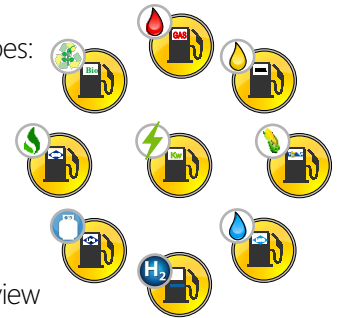

Multi-Fuel Management from FuelForce®

Manage Multiple Fuel Types

More and more fleets are adopting alternative fuels for both economic and ecological reasons. This presents a challenge to the modern fleet manager as the costs of these fuels must still be captured, regardless of the dispensing mechanisms used. With FuelForce® fuel management solutions, truly integrated management of fuels of all types can be easily accessed, and with our leading FuelServe.net cloud-based management platform, that access can be had from any device at anytime, anywhere you need!

The FuelForce® platform is built upon decades of experience in managing fleet fuels of all types:

- Gasoline
- Diesel
- CNG
- LNG
- Propane
- E85
- BioDiesel
- Hydrogen
- Lubricants

Multiforce has been on the cutting edge of fuel management technology for over 35 years and continues to innovate, the most recent being our FuelForce/EV™ solution which allows fleet managers to manage electricity as a standard fleet fuel. With FuelForce/EV™, you can view the utilization of kWh alongside the gallons of other fuels dispensed, and sort and group that usage by driver, department, site, etc. Call us today at (609) 683-4242 to arrange a webinar and demonstration.

Fully Integrated Reporting

The power of multi-fuel management is the ability we give fleet managers to see all of these fuel types from a single dashboard and single reporting environment. The sample report below shows diesel, unleaded, CNG and electricity side by side. This patent-pending feature is the only one in the industry to include kWh with all other fuels.

Why FuelForce® Fuel Management?

Identify

Manually or automatically identify drivers and vehicles, reducing fuel theft and reporting misallocation.

Authorize

Authorize only valid drivers, valid vehicles, and/or valid odometer readings before dispensing fuel.

Measure

Accurately measure fuel dispensing transactions of all types, logging fuel data with precision.

Report

View standard and customizable reports for fuel usage across multiple sites and departments.

Connectivity Options
